

MILES JORGENSEN

QA AUTOMATION ENGINEER

Long Beach, California, 90814, United States | milesbjorgensen@gmail.com | (805) 868-0338 | [LinkedIn](#)

PROFILE

QA Automation Engineer with experience testing distributed, real-time systems in production-scale consumer applications. Strong background in Python and Java-based automation, CI-driven regression, and end-to-end validation of backend services and frontend state. Known for improving test reliability, building automation tooling, and mentoring teams transitioning from manual to automated testing.

PROFESSIONAL EXPERIENCE

QA Automation Engineer, theScore

Apr 2024 — Nov 2025

Long Beach, California

- Served as QA Automation Engineer for critical back-end services responsible for real-time propagation of betting and account state to the front-end across theScore Bet / ESPNBet applications
- Validated end-to-end bet lifecycle behavior, ensuring user bets updated accurately across the UI based on real-time game events, settlement outcomes, and account state changes
- Owned execution, analysis, and reporting of regression test results for each release, including ad hoc validation of new builds and on-demand smoke and regression test execution via Jenkins
- Actively triaged automation failures caused by application defects, test flakiness, and test code issues; refactored and optimized automation code to increase average passing rate by 23% and decrease test execution time by 40%
- Led a proof-of-concept effort to automate an internal event-simulation tool that recreated live sports events in lower environments, significantly increasing testable scenarios and reducing automation failures caused by lack of available events
- Played a key role in upskilling manual QA engineers during a team-wide automation migration, leading knowledge transfer sessions on Jenkins usage, test execution, result triage, and day-to-day automation workflows

QA Automation Engineer, CASHet

Feb 2023 — Jul 2023

West Hollywood, California

- Developed and maintained automated test suites for web and mobile applications using Python, Pytest, Selenium, and Appium
- Created detailed test cases from design and functional requirements provided by studio clients, ensuring accurate validation of budgeting and P-card workflows
- Played a key role on a small automation team, owning a significant portion of framework development and test coverage across the application
- Collaborated with developers and product stakeholders to clarify requirements, identify risk areas, and ensure test scenarios aligned with production-critical finance operations
- Investigated automation failures and conducted root-cause analysis across both application defects and test code issues, implementing fixes to improve overall reliability

QA Automation Engineer, Altruist

Jan 2021 — Jul 2022

Los Alamitos, California

- Responsible for creating test cases for new and existing features within the web application
- Partnered with engineering and product management to ensure quality delivery of every feature being developed, while reducing bug leakage
- Trained, mentored, and served as a role model for junior team members while managing a team of QA trainees

EDUCATION

California State University, Long Beach

Aug 2015 — Jan 2019

Bachelor of Engineering - BE in Aerospace Engineering
