

Miles Jorgensen

Quality Assurance Automation Engineer

 milesbjorgensen@gmail.com  Long Beach, CA  [LinkedIn](#)  (805) 868-0338  [Personal Website](#)

Professional Summary

QA Automation Engineer with experience testing distributed, real-time systems in fintech and high-traffic consumer applications. Specialized in building scalable automation frameworks, validating complex transaction workflows, and improving CI-driven regression reliability. Known for increasing test stability, reducing execution time, and enabling teams to transition from manual to automated testing.

Professional Experience

QA Automation Engineer, theScore | Long Beach, CA

Apr 2024 - Nov 2025

- Developed and maintained automated tests for high-traffic sports betting applications, validating real-time updates to betting and account state
- Removed a major testing bottleneck by identifying live-data gaps and leading development of an automated live-betting simulator, enabling reliable execution of critical test scenarios
- Mentored QA team members through the transition to automation, leading training and fostering continuous skill growth
- Identified and debugged issues across APIs and backend services, collaborating with developers to resolve data synchronization and timing-related defects

QA Automation Engineer, CASHet | West Hollywood, CA

Feb 2023 - Jul 2023

- Developed and executed test cases ensuring accuracy and consistency in financial data processing and reporting
- Built and maintained automation frameworks to support regression testing and improve test efficiency
- Collaborated cross-functionally to define requirements, acceptance criteria, and test strategies for new features
- Identified gaps in test coverage and implemented improvements to strengthen validation of critical system behavior
- Investigated and resolved defects impacting financial workflows and user experience

QA Automation Engineer, Altruist (Contract via SQA²) | Long Beach, CA

Jun 2021 - Aug 2022

- Designed and executed test strategies for core financial workflows, including account funding, transfers, and money movement, ensuring accuracy and reliability in a regulated environment
- Validated end-to-end transaction flows, identifying discrepancies in balances, state transitions, and backend processing before production release
- Expanded automation coverage for high-risk financial features by converting manual regression cases into automated tests, reducing release risk
- Built and maintained Selenium-based UI automation to validate advisor-facing tools and client account functionality
- Investigated and triaged defects related to transaction processing and data integrity, driving issues through resolution with developers

QA Analyst, SQA² | Long Beach, CA

Jan 2021 - Jun 2021

- Authored detailed test cases and test plans based on product requirements, ensuring comprehensive coverage of new and existing features
- Logged, tracked, and triaged defects using bug tracking tools, providing clear reproduction steps and collaborating with developers to drive resolution
- Developed a strong foundation in SDLC and Agile methodologies, participating in sprint planning, standups, and release validation activities

Technical Skills

- Selenium + Appium
 - Python / Pytest
 - Java / Kotlin Automation
 - CI / CD Pipelines
- Jenkins
 - API / UI Automation
 - Regression Testing
 - End-to-End Testing

Education

California State University, Long Beach
BE in Aerospace Engineering **Aug 2015 - Jan 2019**
